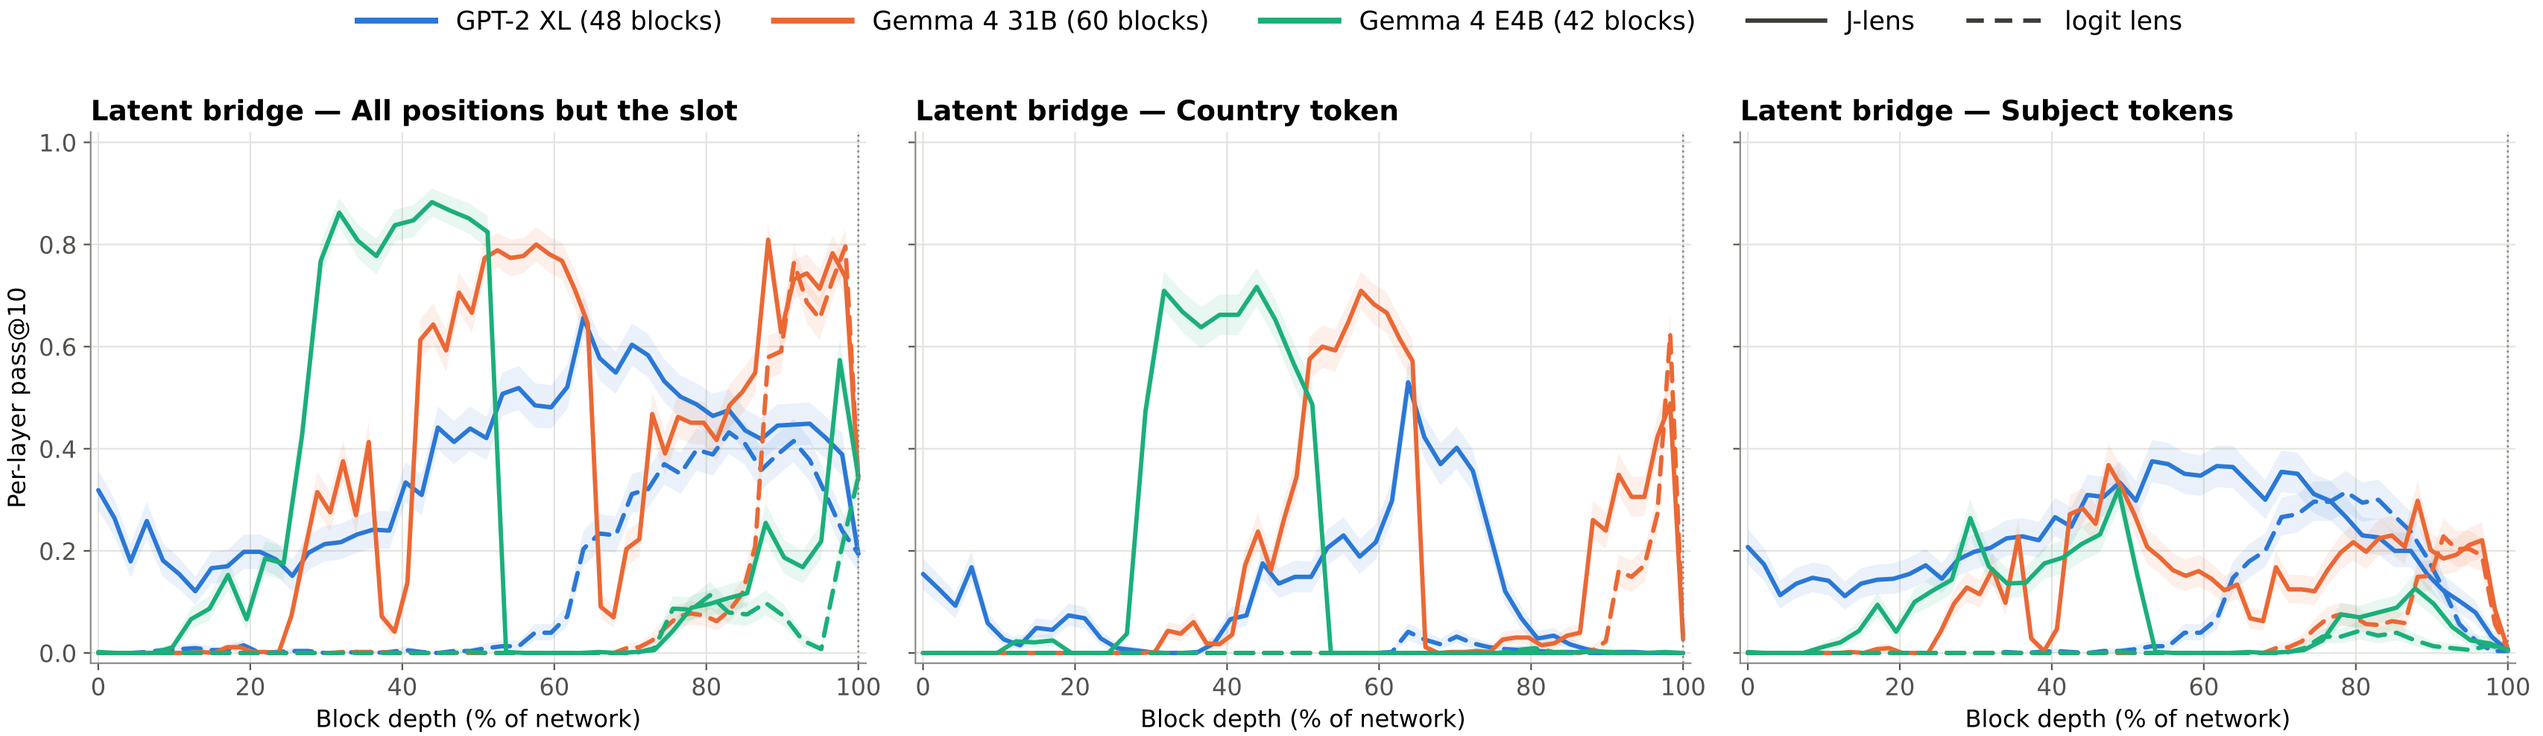
Latent bridge: where the bridging country is readable, layer by layer



Pass@10 at a single block (country word in the top 10, minimum over the span's positions); shaded = pointwise 95% paired-bootstrap intervals (10,000 resamples), not corrected across blocks.
Dotted line = final block, shared by both lenses. Exact values from each model's layerwise notebook export; 530 latent-bridge prompts.
